

DT-12

The **DT-12** Mechanical Harvesting series provide cost effective solution for modern groves of Olive and Almond trees. Dotan's patented linear Shaking technology maximizes crop removal rate, while maintaining tree health.

The system is available in 3 versions, each with a different method for handling and removing the crop from the field.

Highlights

- A complete 2-piece system includes Shaker and Collector
- Field capacity - up to 1200 tree/day
- Trunk diameter - 5cm - 55cm
- Harvesting speed - 7sec Almond, 15sec Olive
- Ease of use - Fully automatic single -button operation
- Advanced Monitoring System
- Quick and easy adjustment to any land profile
- Advanced hydraulic system enables easy maneuvering
- Adjustable frequency and unbalanced weight

Additional details

- Carried by a standard 70-80HP tractor
- Minimum trunk height - 50cm
- Number of operators -2/3
