

PRESS RELEASE

Israeli water technology companies to the mining sector Delegation to Visit Perth 28-30 June

Australia has a substantial resources industry and is a world leader in mining technologies with Perth being the Capital of Australia's mining industry. The mining industry is a major user of water and is in constant search of better water technologies to suit their special needs.

Israel is known as the silicon valley of water. Israel has been confronted with extremely limited natural resources due to its location and terrain, it has had to develop innovative water technologies and waste water treatment and is becoming a world leader in the field of clean tech.

With Israel being one of the world leaders in clean tech and water technology, there is a clear synergy between these sectors and vast opportunities for collaboration between the two countries.

Following the very successful visit by Dr. Graham Jacobs, WA Water Minister to Israel, together with the Israel Trade Commission hiring a Perth based consultant in the mining sector who has already met with Israeli water technology companies, there is no better time to expose the Australian mining sector to innovative Israeli companies who deal in water technology.

From **Mon 28th June** to **Wed 30th June** the *Israel Trade Commission* ([ITC](#)), together with the *Australia-Israel Chamber of Commerce* ([AICC](#)), *The Chamber of Minerals and Energy of WA* ([CME](#)), *The Chamber of Commerce and Industry of Western Australia* ([CCI WA](#)) and *Austmine* ([Austmine](#)) will be leading a trade delegation to Perth made up of major Israeli companies who offer Water Technology. These companies include:
