

As Part of the
ECU – Innovation Series 2010

In cooperation with

THE CHAMBER OF MINERALS
AND ENERGY OF WA

CHAMBER OF COMMERCE AND INDUSTRY
WESTERN AUSTRALIA

*The Israel Trade Commission's Industry Seminar: **Water Technology to the Mining Industry***

The **Israel Trade Commission (ITC)**, together with the **Australia-Israel Chamber of Commerce** as part of the ECU – Innovation Series 2010 (**AICC**), in cooperation with the **Chamber of Minerals & Energy of Western Australia (CME)**, the **Chamber of Commerce and Industry of Western Australia (CCIWA)** and **Austmine (Austmine)** would like to invite you to attend this one off Mining Seminar.

Australia has a substantial resources industry and is a world leader in mining technologies. The mining industry is a major user of water and is in constant search of better water technologies to suit the special needs of this sector.

Israel is known as the silicon valley of water. Israel has been confronted with extremely limited natural resources due to its location and terrain. It has had to develop innovative water technologies and waste water treatment solutions, and is becoming a world leader in the field of cleantech. Currently, Israel recycles over 70% of all water used.

An ambitious \$13 billion Australian Federal investment plan in water technologies, coupled with the progress of major gas and mining projects in WA's north, have made Perth a very interesting destination for innovators in water technology and clean technology which are predominant in the mining sector, agricultural sector, energy sector plus many more. This coupled with a successful visit to Israel of Western Australia's Water Minister, The Hon. Dr. Graham Jacobs, has made Perth a very interesting destination for many Israeli Water companies.

With Israel being one of the world leaders in clean tech and water technology, there is a clear synergy between these sectors and vast opportunities for collaboration between the two countries.

Official Opening: *The Honourable Dr. Graham Jacobs, WA Minister for Water.*

Date: Tuesday 29th June 2010

Time: 09:00am – 12:00pm

Venue: Astral Room Three

The Convention Centre, ([map](#))

Burswood Entertainment Complex, Perth

This event is *complimentary* but places are limited so please RSVP with your name, contact details and company information to richard.vesely@israeltrade.org.au or at 02 9388 0382 to reserve your spot. Refreshments will be served during this event.

Speakers at this event will include:

*The Honourable Dr. Graham Jacobs, **WA Minister for Water*** – Official opening of Seminar and reflections of his experiences from a recent trip to Israel

*Mr. Graham Laitt, **Managing Director and CEO Milne Agrigroup Pty Ltd*** –Using treated water from the mine sites for the benefit of the agricultural industry, and how mining and agriculture could help sustain each other

Graham Laitt is the CEO and Managing Director of Milne AgriGroup Pty Ltd, one of the largest integrated agribusinesses in Western Australia, which includes well known brands such as Mt Barker Chicken and Milne Feeds. He is also the Principal of Livinga Pastoral Co., which owns and operates cattle stations and a number of farms in Western Australia.

*Mr. Dennis Gibson, **Dennis Gibson & Associates Pty Ltd*** – Australian Mining Sector and Israeli Water Technology

Dennis Gibson has extensive global experience in the water, mining, infrastructure and engineering sectors over the past 30 years, including 20 years within the Rio Tinto Group. Dennis consults to national and international clients, including the Israeli and West Australian Governments, and assists national and international companies to develop market entry strategies into the mining sector.

This seminar is held to coincide with the Israeli Delegation’s visit to Perth. This **Israeli Delegation is focused on what solutions Israeli Water Technology companies can offer to the Australian Mining Sector**. This is your only chance to meet the most innovative Israeli companies that are relevant to the Mining sector. For more information on this delegation to Australia, please [click here](#).

The following Israeli Companies will be in attendance on this incoming delegation;

Company Name	Technology
A.R.I. Flow Control Systems	Air Valves
Amiad	Wastewater Filtration
Baccara Geva	Air Valves
BallTech	Cleaning System for heat exchangers
Beth-El.	Air Filtration
Bio Pure Technology	Nanofiltration membranes
C-Valve	Valve solutions for water supply
EWA Technologies	Extraction of Humidity from Air
Golan Plastic	Plastic Piping
IDE Technologies	Wastewater Treatment
Netafim	Irrigation Products
Nirosoft	Wastewater Treatment
Odis Filtering	Wastewater Treatment
Plasson	Polyethylene Piping and Joints
